Dear Mr. Metcalf,

I am going to ask another favor of you. Could you squeeze the enclosed little filler into the October issue; I have made it very short & make this more likely. I would be much pleased if you could. I am paving the way for the discussion of a paper which I expect to read. My paper may perhaps be in the November issue & this filler ought to precede it.

You will find nothing objectionable in this & no attack on anybody. I am sure Mr. Morrow would approve it. My opponents will at first oppose it, but will no doubt admit that I am not wrong.

I am glad that you are now listing the fillers in the index. Formerly you did not do this. Some of them may be looked for in the future & if not indexed it is very difficult to find them in back numbers.

Thanking you for past favors

Yrs truly
Carl Hering

Dear Mr. Metcalfe

I have a letter from you dated March 3, 1925 -
in which you sent me the manuscript of an article
by J. W. Lyle commenting on my paper on "A Constant
e. n. f. Without Sliding Contacts."

A few days later I sent you my reply dated Mar. 9
& quite short.

I have not seen this published in your journal
this now 6 mos. old.

Was it published & if so, when. Or is it still to
be published. Or has it been killed or withdrawn.

On several other occasions a proposed attack against
me was voluntarily withdrawn by the author, after he
heard what my reply would be. Perhaps this is another.
Some people act upon their first thoughts, and their second thought
is sometimes the healthier one.

Yours truly
Carl Hering
