

College Hill Mass. Sept 26.

Mr Geo. Walker

Vice Pres. Gold & Slock Co.

Dear Sir

The papers were misssent  
and only reached me to day.

I dont know when they went  
but the Envelope was marked  
so and one end of it half  
torn off. !!!

I have subscribed to them  
and return them at once to  
you. The address to the  
journal paper that I added  
was copied from a like paper  
given by the Howard Elec. Clock  
Co, to one whose patent they  
bought in like manner.

I inferred that it was possible  
for an invention to report to the  
inventor under some circumstan-  
ces. However your attachment  
appears to answer, I haven't the  
slightest knowledge of legal tech-  
nics, so don't know a "bald" from  
a well haired legal phrase.

I shall leave it wholly to you to  
do what is best about the inven-  
tion. You have the advantage in every  
particular. I can see where you might  
trade now with Mr. Hubbard, and I  
be without any claims whatever,  
but I have no reason to doubt  
but that you will deal honorably  
with me. As to what

Mr. H. says I said at his house  
I deny it, in toto, and pronounce  
it a fabrication.

I presume that the plan you  
suggest of a combination of

all telephonic interests will be judicious.  
but how shall I know what I had better do  
until I learn whether or not I have any  
interest to be defended??

Any letter hereafter directed to me should  
be simply directed to College Hill, Mass.

A telegram will reach me about as soon  
if sent by mail from Boston.

Yours &c,

A. E. Dolbear

Prof. W. L. DeLbean
